## OBJECTIVE

---

To work with an organization where can learn new skills and increase my abilities for the organizational goals as well as myself.

## EXPERIENCE

---

### FullStack Web Developer (By Orinson Technologies)

Intern, Building projects (web development)

- ❖ As a Web Developer, I am designing, coding and modifying website according to client specifications.
- ❖ My expertise includes advanced frameworks, responsive design, and creating applications that Seamlessly function across deffrent devices.

## PROJECTS

---

### ECommerce | React.js, Express.js, MongoDB

- ❖ I create a MERN Stack ECommerce Project. Utilizing MongoDB, Express.js, React, and Node.js, in this project Admin can create categories of the product. And on the basis of category it can create products. User can login and add the products in there cart and then it can buy product through card payment.

### School Management System | MERN

- ❖ I created a School Management System project. In this project I create different roles like Admin, Teachers and Students. It's all having different pages. Admin can register then login and it can add the classes, subjects, teachers and students information. Admin manage the all data of school.

### Pinterest-Project | MERN, Cloudinary

- ❖ I created a pinterest project . it is created by using mern technologies. in this project a user can register and login and then it can create a pin, delete a pin add comments and delete the comments a user can follow and unfollow to another profiles. Save all the information of user and pin in the database and also created pin can upload on the cloudinary.

## TECHNICAL SKILLS

---

- ❖ **Languages:** C++, JavaScript, HTML/CSS, SQL
- ❖ **Technologies/Frameworks:** Bootstrap, React.js, Express.js, Node.js
- ❖ **Database:** MongoDB
- ❖ **Concepts:** DSA, Operating System, DBMS, Computer Network

## ACHIVEMENTS

---

- ❖ **Coding ninjas** – I have Achived badges in dsa topics and earning 2375 EXPs.
- ❖ Solve many problems on CodeChef, Coding ninjas, GeeksforGeeks, leetCode.
